Shanghai style lesson observation

How an English primary teacher had his maths lesson observed while in Shanghai, and how this style of group lesson observation and refinement is becoming (partially) replicated in Maths Hubs work in England.

Show notes:

Taking part in the discussion are:

- ▶ Jonathan Leeming, Mastery Specialist and primary school teacher in Lancaster. Read [his account](#) in the NCETM Primary magazine of being observed in Shanghai.
- ▶ Helen Madeley, Mastery Specialist and primary school teacher in Lancaster area, and also part of the leadership team of [North North West Maths Hub](#).
- ▶ Steve McCormack (NCETM Communications Director)

In mid-January, 2018 the second wave of primary teachers from Shanghai arrive in England as part of the ongoing England-China exchange programme. They will spend two weeks teaching maths to primary school classes in Maths Hubs areas across England, including 'showcase' lessons where observation seating for up to 100 teachers is organised. Contact your local Maths Hub to find out if there's a showcase near you in the week beginning Monday 22 January.

Really interesting to hear how successful the maths TRG is and the valuable experiences from Shanghai. I took part in a TRG with my maths hub last year and would be interested to know how others schools are doing now they are doing now the TRG has finished?
